SUMMARY

Senior Flutter and AI-native product engineer with 4+ years of experience and 20+ published applications across telecom, fintech, POS, travel, and healthcare. Builds Flutter apps for mobile, web, and desktop, with additional work in React Native, native Android and iOS, and Next.js. Owns delivery from architecture through App Store and Google Play release. Uses coding agents and Model Context Protocol tools to shorten feedback loops, and reviews and tests everything that ships.

EXPERIENCE

Senior Flutter Developer | DPL, deployed to Axian Group January 2026 – Present
Islamabad, Pakistan

- Delivering Flutter applications within Axian Group, a pan-African telecom and fintech group, across several product lines.
- Building the Yas SelfCare App, which lets telecom subscribers manage their accounts, plans, and usage.
- Building a fintech application for digital payments, wallet management, and financial services.
- Delivering cross-platform features for network service management and subscriber experience on a telecom platform for African markets.

Flutter Developer | Impact IT Solutions April 2025 – December 2025
Islamabad, Pakistan

- Managed and maintained a Flutter desktop POS system deployed across multiple University of Wollongong (UOW) outlets in Australia, covering items and categories, stock, suppliers, purchase orders, cashier, and kitchen operations.
- Developed and maintained Pulse, a mobile app for UOW students covering food ordering, book purchasing, vouchers, coupons, events, and membership subscriptions.
- Implemented discount and promotion systems, including vouchers, coupons, and promotional offer management.
- Kept systems reliable through performance monitoring, issue resolution, and work with other teams.

Flutter Developer | KodersPoint July 2023 – September 2025
Lahore, Pakistan (Remote)

- Architected and delivered MVPs and full-scale Flutter applications for e-commerce, services, and utilities clients, with additional projects in React Native and Java (Android).
- Built and deployed Flutter Web admin panels for business management workflows.

Software Engineer | HeapStash Global November 2023 – March 2025
Lahore, Pakistan (Remote) | Client: Sheikh Maktoum NEO Technologies, UAE | Promoted to Software Engineer, September 2024

- Built Neo One, a Flutter fintech app integrating bank account linking and cryptocurrency wallet management, with IBAN generation, card issuance, Plaid, Striga, and KYC flows.
- Built Neo Pass, a Flutter Web platform for international flight bookings with cryptocurrency payment support.

Flutter Mobile App Developer | Khastech Solutions July 2022 – November 2023
Islamabad, Pakistan | Joined as a full-time intern, moved to a regular appointment in October 2022

- Developed and published 20+ Flutter applications to Google Play and the App Store, growing the company's App Store presence from 0 to 20+ live apps.
- Delivered AI-powered image processing apps for enhancement, background removal, and sketch effects using Google ML Kit, OpenCV, and FFmpeg.
- Built Intelligent Character Recognition (ICR) apps for document scanning and text extraction.
- Created fitness tracking and pedometer apps, with ad and in-app purchase monetization.

SKILLS

Core: Flutter (mobile, web, desktop), Dart, React Native, Native Android, Native iOS, Kotlin, Swift

AI-assisted engineering: Agentic AI, Model Context Protocol (MCP), AI coding agents, Claude Code, human-in-the-loop review

Firebase: Firestore, Realtime Database, Auth, Cloud Messaging, Analytics, Crashlytics

State management: Flutter BLoC, Provider, GetX

Networking & storage: REST APIs, HTTP, Dio, JSON serialization, SQLite, Hive, SharedPreferences

Payments: Stripe, PhonePay, Linkly, Plaid, Striga, Weavr, in-app purchases, subscription management

Notifications & maps: FCM, OneSignal, Flutter Local Notifications, Awesome Notifications, Google Maps, Geolocator, Geocoding

ML & media: Google ML Kit, OpenCV, FFmpeg

Ads: Google AdMob, AppLovin, Meta Audience Network

Web & backend: Next.js, React, TypeScript, Node.js, Express.js

Practices & release: Git, Clean Architecture, MVVM, REST API design, Agile/Scrum, CI/CD, Google Play, Apple App Store

SELECTED PROJECTS

- **Yas SelfCare App:** Flutter self-care app for Yas, Axian Group's telecom brand (current build).
- **iPOS:** Flutter desktop POS for UOW, with inventory, purchasing, cashier, kitchen, and Linkly payment modules.
- **Elemed:** Doctor appointment app with Firebase real-time sync, secure auth, and patient-doctor communication.
- **MyClickerr:** Photographer booking marketplace with in-app chat, Stripe payments, and push notifications.
- **BrightFlix:** Cross-platform streaming app with recommendations, user profiles, and content filtering.
- **Nop Commerce App:** E-commerce app with order tracking, cart management, and secure checkout.

OPEN SOURCE

Published under the verified **syedmubashirali.com** publisher on pub.dev.

- **nexio:** Flutter networking runtime for Dio with environments, encryption, isolate parsing, retries, caching, offline queues, transfers, and observability.
- **system_contact_picker:** Native Flutter contact picker for Android 17+, legacy Android devices, and iOS ContactsUI.

EDUCATION

Bachelor of Science in Computer Science, PMAS Arid Agriculture University, Rawalpindi — October 2018 – June 2022

CERTIFICATIONS

Claude Code for Professional Developers, Code With Mosh (June 2026)

Mastering Next.js with TypeScript, Code With Mosh (August 2025)

Node.js, Express & More: Complete Bootcamp, Udemy (April 2025)

Flutter BLoC - Zero to Hero, Udemy (May 2024)

LANGUAGES

English (professional proficiency), Urdu (native)
